About

The nautical tourism sector is gaining more and more interest by consumers. This is great news for the environment, as nautical tourism can be an ally for sustainability, but something is still missing. The EnviroNaut project has identified the missing link to boost tourism and sustainability at the same time: the newly developed position of the Environmental Officer.

Environmental Officers will play a key role in promoting sustainable nautical tourism, filling the skills gap between the workforce and the needs of the industry.

Objectives

to involve the nautical sector at regional, national and EU level

to facilitate the transition of the whole sector towards more sustainability and environmental protection

to increase the environmental awareness of the whole sector and to a broader public

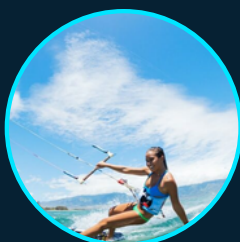

to create a curriculum that can be used in the whole sector and will be transferable to other countries in the Union and beyond

Target Groups

**NAUTICAL INDUSTRY
& EMPLOYEES**

**WATER SPORTS
CLUBS AND USERS**

**POLICYMAKERS
AND CHAMBERS**

STAKEHOLDERS

Project Results

ENVIRONAUT COURSE CURRICULUM

The main addition that the EnviroNaut project will bring to the sector is the development of the first-ever curriculum for the position of Environmental Officer in Nautical Tourism.

People qualified as Environmental Officers will bring added value to their companies, as they can help develop "sustainable nautical tourism".

ENVIRONAUT ONLINE COURSE

The curriculum will take the form of a modular online course, free of charge and accessible to everyone. All those who successfully complete the course will be awarded a European-wide qualification by the European Boating Industry as Environmental Officers.
